WORTH – AI USE CASES FOR MVP (FINANCE COPILOT)

🔓 FREE VERSION – AI USE CASES (STRICTLY LIMITED)

Purpose: Show immediate value, build habit, but *intentionally limit depth* so users feel the upgrade pull.

Limit: 3 prompts per month

Free AI Use Case 1: 📄 "Am I Overspending This Month?"

Input (implicit from system):
- Current month expenses
- Average last 3 months expenses
- Budget (if set)

AI Output:
- Overspend % vs last month
- Top 1–2 categories causing spike

Teaser Line:
"Upgrade to see category-level improvement plan."

Free AI Use Case 2: "Am I On Track For My Goal?"

Input:
- Target amount
- Current savings
- Timeline

AI Output:
- On track / Slightly behind / Behind
- Simple monthly required saving
- No long-term simulation

Teaser:
"Upgrade to see timeline impact and acceleration plan."

Free AI Use Case 3: "Is My Debt Level Safe?"

Input:
- Total EMI
- Monthly income
- Credit utilisation

AI Output:
- Basic debt stress classification:
  - Low / Moderate / High
- One-line advice

Teaser:
"Upgrade to see debt-reduction strategy."

2️⃣ PREMIUM VERSION – 15 HIGH-VALUE AI USE CASES

These are **not generic chatbot questions** — they require:

- Live financial data
- Goal context
- Cash-flow + liabilities
- Indian financial reality

🧠 CATEGORY A: DECISION-MAKING (HIGHEST VALUE)

Premium Use Case 1: "Can I afford X?"

User asks: "Can I Afford X?" (eg – foreign trip, car, Iphone)

AI analyses:
- Cash balance impact
- Monthly surplus
- EMI risk
- Goals delay
- Emergency fund impact

AI answers with:
- Yes / No / Conditional Yes
- Exact trade-offs
- Goal delays (in months)

Premium Use Case 2: Lifestyle Inflation Detection

User asks: "Is my lifestyle getting more expensive?"

AI analyses:
- Last 6–12 months spending trend
- Income growth vs spend growth

AI response:
"Your income grew 8% YoY, but discretionary spending grew 21%.
This trend may reduce long-term savings by ₹14.2L over 10 years."

Premium Use Case 3: "Can I increase my SIP?"

User asks:
"Can I increase my SIP by ₹10,000?"

AI checks:
- Monthly surplus (Free cash flow)
- Emergency fund adequacy and goal safety
- EMI load (upcoming liabilities)

Response:
"Yes. You can safely increase your SIP by ₹7,500.
Increasing by ₹10,000 would reduce your emergency buffer below 4 months."

🎯 CATEGORY B: GOAL FEASIBILITY & LIFE PLANNING

Premium Use Case 4: Goal Feasibility Check

User asks:
"Is my house downpayment goal realistic?"

AI outputs:
- Probability score
- Required monthly savings
- Gap analysis

Premium Use Case 5: Goal Conflict Detection

User asks:
"Are my goals clashing?"

AI detects:
- Overlapping cash demands
- Unrealistic timelines

Example:
"Your vacation goal and house downpayment goal overlap in cash requirements for 9 months."

Premium Use Case 6: Delay Impact Analysis

User asks:
"What happens if I delay this goal by 1 year?"

AI shows:
- Monthly savings reduction
- Stress reduction
- Net worth impact

💳 CATEGORY C: DEBT & RISK INTELLIGENCE

Premium Use Case 7: Debt Stress Analysis

User asks:
"Is my debt level healthy?"

AI computes:
- EMI / Income ratio
- Credit utilisation
- Stress score

Premium Use Case 8: EMI Overload Warning

AI proactively tells user:
"If you take another EMI above ₹8,000/month, your debt stress enters high-risk territory."

Premium Use Case 9: Credit Card Behaviour Insight

User asks:
"Am I using my credit cards correctly?"

AI checks:
- Utilisation %
- Repayment behaviour

💸 CATEGORY D: CASH-FLOW INTELLIGENCE (INDIA-SPECIFIC)

Premium Use Case 10: Subscription Leak Detection
User asks:
"Am I wasting money anywhere?"

AI identifies:
- Unused subscriptions
- Low-usage expenses

Premium Use Case 11: Safe Spend Limit

User asks:
"How much can I spend guilt-free this month?"

AI computes:
- Safe discretionary spend number

Premium Use Case 12: Income Shock Simulation

User asks:
"What happens if my income drops by 20%?"

AI simulates:
- Emergency runway
- Goal delays
- Risk alerts

👪 CATEGORY E: FAMILY & LIFE EVENTS (VERY RARE IN INDIA)

Premium Use Case 13: Family Readiness Check

User asks:
"Are we financially ready to have a child?"

AI checks:
- Current expenses
- Savings
- Insurance adequacy
- Emergency fund

Premium Use Case 14: Long-Term Wealth Trajectory (Retirement planning)

User asks: "At current pace, what will my net worth be in 10 years?" or another question could be "At this pace, when will I realistically retire?"

AI evaluates:

- Current portfolio of assets based on last 5 year returns to project future value in 10 years.
- Current liabilities situation and if on track to pay off debts and EMIs.
- Uses savings rate
- Gives a number based on analysis of current scenario of the user. (Projects retirement shift)

Premium Use Case 15: Annual Financial Health Review

User asks:
"Give me my yearly financial review."

AI outputs:

- What improved
- What worsened
- 3 priority actions for next year

📄 This can also generate a **downloadable report**.

3️⃣ HOW TO TRAIN THE AI (IMPORTANT)

"The AI must NOT be a generic chatbot. It must answer from structured financial data only."

AI Input Context (Mandatory)

- Net worth snapshot
- Assets breakdown
- Liabilities & EMIs
- Monthly cash flow
- Goals & timelines
- Risk flags

AI Output Rules

- No product recommendations
- No buy/sell advice
- Always quantify impact
- Always explain trade-offs
- Use Indian context (₹, EMIs, family obligations)

🔒 REGULATORY SAFETY NOTE (VERY IMPORTANT)

Our AI: ✅ **Analyses situations**

❌ **Does NOT recommend financial products**
This keeps us:

- SEBI-safe

- RIA-aligned
- Trust-first

🟢 FREE VERSION (Habit Builder)

Purpose:
Let users see their money.
Not optimize it.
Not simulate it.
Not stress-test it.

1️⃣ Net Worth Dashboard (Basic)

User sees:
• Total Assets
• Total Liabilities
• Net Worth
• Monthly change %
• Basic graph

Backend Logic:
Net Worth = Assets – Liabilities
Monthly Change = Current Month Snapshot – Previous Month Snapshot
No deeper breakdown.

2️⃣ Asset & Liability Tracking

Free Includes:
• Bank balances (AA)
• Mutual fund holdings (AA)
• Stocks (AA)
• EPF/PPF (AA)
• NPS (AA)
• Vehicles (AA)
• Real estate (Manual)
• Credit cards (AA)
• Loans (Manual)
• Basic EMI calculation

No risk flags.
No debt stress analysis.

3️⃣ Spending Overview (Basic)

User sees:
• Monthly spend and yearly spend
• Category breakdown
• Pie chart and bar chart
• Transaction list

Backend:
Monthly Spend = Sum(debits excluding transfers)

No:
• Budget enforcement logic
• Lifestyle inflation detection
• Subscription leak detection

4️⃣ Goals (Limited)

Free Users Can:
• Create up to 2 goals
• See required monthly saving
• See simple progress %

Backend:
Required Monthly Saving =
(Target – Current Savings) / Remaining Months

No:
• Slippage analysis
• Timeline delay calculation
• Risk adjustment
• Emergency fund sufficiency logic

5️⃣ Finance Copilot (Free – Controlled)

Free gets:
• 3 prompts per month
• Only basic template questions:
  - "Am I overspending?"
  - "What is my current savings rate?"
  - "How much do I spend monthly?"

Copilot uses summary-level data only.
No scenario simulation.
No trade-off modeling.

🔵 PREMIUM VERSION

Premium is:
👉 Decision Engine
👉 Risk Engine
👉 Trade-off Simulator

1️⃣ FINANCIAL HEALTH SCORE (CORE DIFFERENTIATOR)

Backend Scoring Model (100 Points)

Component	Weight	Logic
Savings Rate	25	Monthly Savings / Income
Emergency Adequacy	20	Liquid Assets / 6 months expenses
Debt Stress	20	EMIs / Income
Credit Utilisation	15	Outstanding / Limit
Goal Feasibility	20	Current pace vs required pace

Score recalculated monthly.
User sees:
• Score change explanation
• What caused increase/decrease
• What to improve

Example:
"Your score dropped 4 points because EMI burden crossed 38% of income."

2️⃣ ADVANCED GOAL ENGINE (Real Planning Logic)

Free shows basic goal math.
Premium shows:

A. Timeline Slippage Logic
If monthly contribution < required:
New Completion Date recalculated dynamically.

B. Probability Band
If savings fluctuate:
Confidence Score shown:
• High
• Moderate
• At Risk

C. Goal Stress Simulation
User asks:
"What if I reduce savings by ₹5,000?"

Backend recalculates:
• Timeline delay
• Health score impact
• Emergency fund risk

3️⃣ FINANCE COPILOT – FULL VERSION (Main USP)

Premium unlocks:

A. Scenario Simulation Engine
Allowed premium prompts:

1. "Can I afford a ₹3L trip?"
2. "What if income drops 20%?"
3. "Can I buy a house in 3 years?"

4. “Can I increase SIP by ₹10,000?”
5. “Should I prepay loan or invest?”
6. “Are we financially ready for a child?”
7. “Will taking this EMI increase risk?”
8. “Can I retire at 50?”
9. “How much surplus do I really have?”
10. “How exposed am I to debt?”
11. “Am I becoming lifestyle-inflated?”
12. “What happens if markets fall 15%?”
13. “If I pause SIP for 6 months?”
14. “How much free cash flow do I actually have?”
15. “Is my emergency fund truly enough?”

Backend Capabilities:
• Cash flow projection
• Debt amortisation recalculation
• Goal delay simulation
• Risk flag detection
• Emergency buffer stress testing

4️⃣ CASH-FLOW INTELLIGENCE (Premium Only)

A. Lifestyle Inflation Detection
If spending increases > income growth:
Flag generated.

B. EMI Crowding Warning
If EMIs > 40% income:
Risk alert.

C. Subscription Leak Detection
Recurring merchant detection logic:
If unused recurring pattern → flag.

5️⃣ ADVANCED REPORTS (Premium)
Downloadable:
• Annual Financial Health Report
• Goal Feasibility Report
• Debt Risk Analysis Report
• Net Worth Growth Trajectory Report

6️⃣ FAMILY MODE or Couple Finance (Premium)
Free: Individual view only.

Premium:
• Shared net worth
• Combined goals
• Contribution breakdown
• Family-level health score

CLEAR DIFFERENTIATION TABLE

Feature	Free	Premium
Net Worth	Basic	Advanced breakdown + stress impact
Goals	2 goals, basic math	Unlimited + timeline simulation
Financial Health Score	❌	✅
Scenario Simulation	❌	✅
Trade-off Modelling	❌	✅
Lifestyle Inflation Detection	❌	✅
EMI Stress Analysis	❌	✅
Family Mode	❌	✅
AI Prompts	3 summary prompts	Unlimited full simulations
Advanced Reports	❌	✅

"Premium must unlock financial simulation logic, not UI upgrades.
All Premium features must rely on backend recalculation engines — debt, goals, emergency buffers, and cash flow — not static explanations."

ADMIN MODULE – MVP REQUIREMENTS

Admin Dashboard Must Show:

1️⃣ User Overview
- Total registered users
- Monthly Active users
- Total premium users
- Conversion rate

2️⃣ Subscription Management
- User name
- Phone/email
- Plan (Free/Premium)
- Start date
- Expiry date
- Payment status

3️⃣ AI Usage Monitoring
- Total AI prompts used
- Avg prompts per user
- Top asked questions
- Failed prompts

4️⃣ Data Health
- Linked bank accounts count
- Linked MF count

- Linked Stock accounts
- Avg assets per user

5️⃣ **Basic User Controls**

- Suspend user
- Reset password
- Change subscription plan manually

That's it for MVP. No complex CRM yet.
